# Press Release

## **Colorado Palliative & Hospice Care Is Expanding in Colorado**

Colorado Palliative & Hospice Care executives have purchased two hospices in Denver and Colorado Springs, CO expanding their Midwest based operations from Oklahoma, Kansas and Missouri. They feel their approach will help meet the needs of the growing senior population in this area.

***CEO Phillip Hill says “we are excited to have the opportunity to extend our care to Colorado and the surrounding rural communities. Our approach to hospice and palliative care is desperately needed when over half of seniors eligible for assistance never receive it and most getting help are getting it much later than they should. I have yet to experience a family or patient that thinks they should have waited longer to get help.”***

**Colorado Palliative & Hospice Care’s Mission** is to provide the highest level of comfort and care, honoring and respecting the dignity of each individual, and enhancing the quality of living at the end of life, under the guidance of Christian principles. The company strives to care for others with Integrity, Fairness, Diligence and Generosity doing what we say we will when we say will to the best of our abilities.

While Medicare mandates the services that hospice patients must receive, at Colorado Palliative & Hospice Care, we are committed to exceeding industry standards because we recognize that each patient’s life experiences and spiritual beliefs have created a unique individual who deserves the finest care and emotional support, while honoring and respecting their needs and wishes.

Colorado Palliative & Hospice Care is a Christian principled organization, specializing in caring for their patients and the patient’s families wherever they call home, through personalized plans of care developed with input from the family physician, the hospice physician, the patient, the patient’s family and the members of the hospice interdisciplinary team. The company provides compassionate care and expert pain management to people nearing the end of their lives, as well as ongoing support for the patient’s family and loved ones.
